Berkeley Lab's Cleantech Pitchfest

FREE ADMISSION

Marines' Memorial Theatre
609 Sutter Street (at Mason), San Francisco, CA
7–9 p.m., June 1

INNOVATION WITH A CONSCIENCE

Which of 6 big new ideas designed to help transform our carbon-drenched, overheating world should get the first shot?

Six Berkeley Lab scientists have 8 minutes each to persuade you that their technology has the most promise and social value.

Chinmayee Subban

Energy-Efficient Desalination
Making fresh water from salty sources on the cheap

Marcus Lehmann

CalWave
Harnessing energy from ocean waves

Jeff Urban

Nanoscale Sponges
Capturing carbon with metal-organic frameworks

Kendra Kuhl

Recycling CO_2
Fueling your car on recycled CO_2

Raymond Weitekamp

DIY Efficient Windows
Applying paint-on coatings for energy-efficient windows

Samveg Saxena

MyGreenCar
Test driving "virtually" to compare real fuel economy and EV range

BERKELEY LAB

SCIENCE at the THEATER
